

## **REMARKS**

### **I. Status of the Claims**

Claims 1 - 5, 8 - 12 and 15 stand rejected. Claims 6, 7, 13 and 14 are objected to.

### **II. Rejections Under 35 U.S.C. §102**

In the Office Action, the Examiner maintained his rejection of claims 1, 8 and 15 based on Wyman. However, the Examiner noted the previous arguments asserted by the Applicants regarding current sources and high output impedances. The Examiner further pointed out that while the Applicants argued the current source feature, claims 1, 8 and 15 did not recite the feature.

Consistent with the Examiner's comments, the Applicants have amended claims 1, 8 and 15 to expressly recite "current sources with high output impedances". Since this feature is now expressly recited in claims, 1, 8 and 15, all of the claims are believed patentable over the cited references.

Applicants submit that all of the amendments and remarks set forth above place the claims in condition for allowance, and early notice thereof is respectfully solicited.

Please charge a one-month extension fee of \$110 to Deposit Account No. 20-0515.

Respectfully Submitted
